To offer Client Credit as a payment option simply register at

clientcredit.co.uk

and follow the onscreen instructions.

The Resolution difference

Resolution has partnered with Client Credit to offer its members and their clients' exclusive benefits including preferential rates and a "No Risk" option for divorce and separation matters. For more information see clientcredit.co.uk or call 01202 835035.

“

Resolution's partnership with Iceberg Client Credit offers a loan, with preferential rates, exclusively to Resolution members to help their clients access family legal services. The product allows practitioners to help more clients without impacting on their firm's cashflow – something that is often difficult to balance, and which has become all the more important post LASPO. For added peace of mind, against the rare situation where the client is unable to pay the loan back, Iceberg has now introduced a No Risk option exclusively for members. ”

The Client Credit Account

iceberg
Iceberg Client Credit

Client Credit is an online payment account for legal fees and disbursements that, for registered law firms, allows introduced clients to defer the cost of legal representation until the conclusion of their case.

Clients are able to promptly pay fee notes and disbursements relating to divorce, separation and probate matters by authorising you to debit their account with us.

Introducing clients is easy. There are no forms to complete or detailed case assessments to be provided. Client Credit is intended for those clients who, based upon your assessment, will receive immediate financial award or realisation sufficient to repay their account in full at the conclusion of the case. As a general guide, we suggest that Client Credit best suits those clients whose immediate financial award or realisation is expected to exceed three times the value of financed costs.

To get started, simply register online at clientcredit.co.uk. You will have instant access to your secure online dashboard from where you can manage all aspects of the facility from introducing new clients to charging fee notes and disbursements to existing clients as they fall due.

Key Features:

- **Registration is free for Resolution member firms**
- **Clients do not require independent legal advice**
- **Instant client approval** (subject to status)
- **Simple online account administration**
- **Loans are unsecured**

Financing divorce and separation

A breakdown in a relationship is rarely planned and often brings challenges that continue long after separation.

Agreeing a fair and equitable settlement is a vital first step in rebuilding lives, but in the chaos of the separation this is rarely easy and inevitably requires the help and support of others.

Client Credit has been designed to help those facing divorce or separation to obtain the legal advice necessary to achieve a fair settlement by deferring payment until the proceedings have been concluded.

Key Benefits:

- **No client application fees**
- **“No Risk” option available**
- **Includes Divorce and ToLATA proceedings**

Probate and contested inheritance

With disputes over wills said to be soaring and the cost of probate court fees rising to an unprecedented level, the need for legal fee and disbursement finance has never been greater.

For executor clients, Client Credit offers a solution to meeting the cost of legal representation, including legal fees, court costs and other disbursements such as IHT before probate is granted.

Clients seeking to contest inheritance can also use Client Credit to finance the cost of litigation.

Key Benefits:

- **No monthly minimum payment option available**
- **Court fees and IHT covered**
- **Includes probate and contested will proceedings**
